Tabletop Shielding

Nuclear Shields designs and manufactures lead tabletop L-block shields to protect users from unwanted doses to the body, head and neck. Our designs are available in different lead shielding thicknesses and have a stainless steel finishing to provide maximum ease-of-decontamination. Additionally, lead glass viewing windows have been added to improve visibility while handling radioactive materials.

Product code	Description	Lead thickness		Outside Dimensions (w x d x h)
SW145	Tabletop L-block workstation	5.0	mm	600 x 420 x 420 mm
TTS11	L-block shield	12.5	mm	360 x 480 x 535 mm
